Muhammad Ahmed Abdelhadi

EMPLOYMENT

Angular developer	Bypa-ss	Aug 2021- Present
-------------------	---------	-------------------

- Developed new user-facing features by using Angular, TypeScript, and RxJS
- Design and determined the structure of web pages using HTML, Bootstrap, CSS, and SCSS
- Built reusable code for future use and optimized page loading times
- Collaborated with back end developers to ensure seamless integration of front end and back end code
- Integrate front-end code with back-end code by using the latest angular features
- Designed databases using FHIR resources to identify relevant modules and resources, and determine the relationships between them.
- Investigate to find the best practices and the standard way to implement healthcare softwares
- **Lerevage Knowledge:** Angular, HTML, CSS, SCSS, GIT, Bootstrap, RXJS, Agile

Angular developer	Esusoft	April 2021 - August
-------------------	---------	---------------------

- Developed new user-facing features by using Angular, TypeScript, and RxJS
- Design and determined the structure of web pages using HTML, Bootstrap, CSS, and SCSS
- Built reusable code for future use and optimized page loading times
- Collaborated with back end developers to ensure seamless integration of front end and back end code
- Integrate front-end code with back-end code by using the latest angular features

Angular developer-Intern	Paynas	3 Months
--------------------------	--------	----------

- Developed new user-facing features by using Angular, TypeScript, and RxJS
- Design and determined the structure of web pages using HTML, Bootstrap, CSS, and SCSS
- Built reusable code for future use and optimized page loading times
- Collaborated with back end developers to ensure seamless integration of front end and back end code
- Integrate front-end code with back-end code by using the latest angular features

Angular developer-Intern

Innovation Technology

2 Months

- Developed new user-facing features by using Angular, TypeScript, and RxJS
- Design and determined the structure of web pages using HTML, Bootstrap, CSS, and SCSS
- Built reusable code for future use and optimized page loading times
- Collaborated with back end developers to ensure seamless integration of front end and back end code
- Integrate front-end code with back-end code by using the latest angular features

SKILLS

- | | |
|-------------|-------------------------------|
| - HTML | - JavaScript |
| - CSS | - Angular |
| - Scss | - Rxjs |
| - Bootstrap | - Data Structure & Algorithms |
| - Git | - Agile |

EDUCATION

Modern Academy

2016 - 2020

- **Major:** Management Information system
- **Programming Course Work:** programming, Database, Newtork, Operating systems
